EXPERT ADVICE

Mr. Sandeep Jain

Founder & CEO - GeeksforGeeks

He started this Journey with just one thought- every geek should have access to a never ending range of academic resources and with a lot of hardwork and determination, **GeeksforGeeks** was born.

Through this platform, he has successfully enriched the minds of students with knowledge which has led to a boost in their careers. But most importantly, GeeksforGeeks will always help students stay in touch with their Geeky side!

"I understand that many students who come to us are either fans of the sciences or have been pushed into this field by their parents.

And I just want you to know that no matter where life takes you, we at GeeksforGeeks hope to have made this journey easier for you."

COURSE OVERVIEW

Data Science has emerged as one of the most sought-after fields in the 21st century. Today, a substantial number of companies depend on the insights derived from data science to make well-informed decisions and formulate strategic action plans.

This comprehensive course combines **Self-paced** learning modules with interactive **Live Guidance Sessions** to provide you with a thorough introduction to the dynamic field of Data Science.

Explore the entire data science lifecycle, from the collection of diverse data types to effective storage, pre-processing, analysis, model building, and deployment, leveraging the latest and most advanced techniques in the realm of Data Science.

SUCCESS STORIES

Richa Jha

Placed at

Bank of America

After a career break, this course allowed me to reassess my prior knowledge and helped me position myself to receive a better job offer. Despite being a young mother, I consistently work toward my objectives. The course is very informative, interesting and beautifully crafted course. I enjoyed the course and learned a lot from it. Its a great course, with a great instructor and I would recommend it to anyone :) GfG Thank you for all your effort.

Eshant Das

Placed at

GeeksforGeeks

As a newbie in the field of Data Science, Python, and Machine Learning, this course was extremely helpful to me in a variety of ways. First, it was so easy to understand that I was able to write fluently in a basic level python course. Secondly, the questions that were provided with each section really helped me to gain confidence. The order in which the course was aligned is fantastic I found it to be incredibly simple to understand the theory, and I was also able to answer questions based on data science thanks to that course. Mentors gives an extremely engrossing introduction to all facets of machine learning.

REVIEWS

Ravi Kumar

I would recommend this course to anyone who is interested in pursuing a career in Data Science. This course helped me in building a strong foundation which eventually led me to my dream job.

Anamika Yadav

A very well-structured and well-balanced course content. Being a beginner in DS, I found the teaching method of the course very helpful!

Rakesh Singh

It was a really good course, everything is well-organized and the concepts are well taught. I advise anyone who is interested in learning data science to definitely go for this course.

Saransh Sethi

For someone who really wants to pursue a career in the field of Data Science, it is worth opting for this course. Highly recommend it!

Yashika Dwivedi

The entire content of this course is very well organized. I got sufficient practical exposure through the live sessions & projects.

QUESTION & ANSWER

I have very basic knowledge of data science & machine learning. Will I be able to cope up with this course?

Basic knowledge of ML & Data Science is more than sufficient to initiate this course. This course is a blend of self paced learning modules & live sessions that will help you gain hands-on experience along with theoretical concepts.

Is this course suitable for students or working professionals?

This course is suitable for students who are interested in learning ML, Data Science and want to gain practical experience.

Are projects important? Will I be able to add the project made in this course to my resume?

Projects do play an important role to showcase that a candidate not only has conceptual knowledge but also has hands-on experience on the technology which is beneficial in bagging out great opportunities. This is a hybrid course, candidates will be making the projects under the guidance of the mentor. These projects can be easily showcased in their respective resumes.

How will these classes be conducted?

It will be a mixture of Pre-Recorded Lectures and Online Live (Live Stream) classes. You can attend this class from any geographical location. It will be an interactive live session, where you can ask your doubts to the instructor (similar to our offline classroom program). You just need to have a working internet and a PC/Laptop.
